Averages - estimate mean

Name:

Set:

Date:

Teacher:

17. (a) The lengths of 100 fish caught in a canal were recorded. The results are summarized in the table below.

Length, l cm	Frequency
$0 < l \leq 8$	25
$8 < l \leq 16$	60
$16 < l \leq 24$	15

Find an estimate for the mean length of these fish.
