18. An international clothing manufacturer employs people in Peru, Mexico, Finland, Thailand and Vietnam.
The number of people employed by the clothing manufacturer in each country is given in the following table.

Country	Number of employees
Peru	564
Mexico	346
Finland	320
Thailand	2130
Vietnam	3450

The clothing manufacturer is arranging a fashion show and decides to invite a total of 18 employees to represent all the employees in the five countries.

Use a stratified sampling method to calculate how many people from each country should be invited to the fashion show.
